Animator | Web/Graphic Designer | VFX Editor

About Me

I am an animation student at Griffith University and self-taught in many skills. My background is in film and digital art/design — complementing my work in motion-graphics and character animation. I hope to one day be able to work on my own short animated films. I have over four years of experience working with clients to deliver effective online advertisements and website content. I love to see a project through from start to finish and i'm not afraid to adapt to new challenges. Examples of my work can be found on my website and online portfolio. danielkenafake.com
